C.W

12.10.2026

Coeffecient of Range:

$$\frac{R}{L+S} \times 100\% \quad ; R = L - S$$

L → largest value

S → Smallest value

Coeffecient of Range: (Quantile dev:)

$$\frac{Q_3 - Q_1}{Q_3 + Q_1} \times 100\%$$

Coeffecient of Mean dev:

$$C.M.D_{(mean)} = \frac{M.D}{mean(\bar{x})} \times 100\%$$

$$C.M.D_{(median)} = \frac{M.D}{median} \times 100\%$$

$$C.M.D_{(mode)} = \frac{M.D}{mode} \times 100\%$$

Coeffecient of standard deviation:

- Also known as variance
